

## **Dr. A.P.J. Abdul Kalam - Summary**

Dr. A.P.J. Abdul Kalam, widely known as the 'Missile Man of India', was a renowned scientist and the 11th President of India (2002–2007). Born on October 15, 1931, in Rameswaram, Tamil Nadu, Kalam rose from humble beginnings to become one of India's most respected leaders and scientists. He played a crucial role in India's civilian space program and military missile development, contributing significantly to projects like Agni and Prithvi. As President, he was loved by people of all ages for his humility, simplicity, and inspirational words, especially for the youth of India. He emphasized education, innovation, and national development through science and technology. Dr. Kalam authored several books, including 'Wings of Fire', 'Ignited Minds', and 'India 2020', which continue to inspire millions. He passed away on July 27, 2015, while delivering a lecture at IIM Shillong—an embodiment of his lifelong dedication to learning and teaching. His life remains a beacon of inspiration, symbolizing determination, integrity, and the power of dreams.
